

Career Proof
GLOBAL
Map your path. Prove your future.

Every route to any career.

Official pay and admission rules for every student, on any device.

careerproofglobal.com

Problem

Careers are invisible. Students know a handful of jobs. Thousands of real careers, and the routes into them, are never explained.

Subject choices close doors silently. The wrong combination at 16 can rule out medicine or engineering, and students find out when they apply.

The rules are scattered. Entry requirements and past cut-offs sit in PDFs, portals and social-media posts.

Pay is guesswork. Salary sites show user-reported estimates, often from another country.

920M

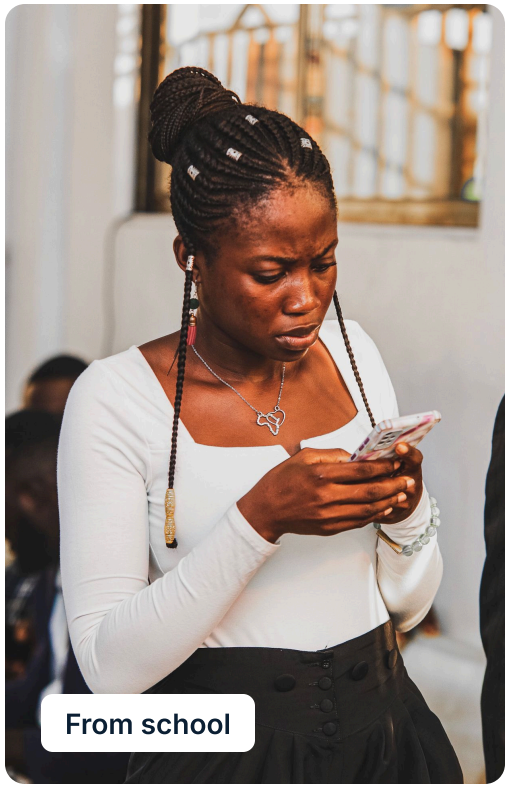

students in secondary and tertiary education worldwide, each choosing subjects, courses and careers

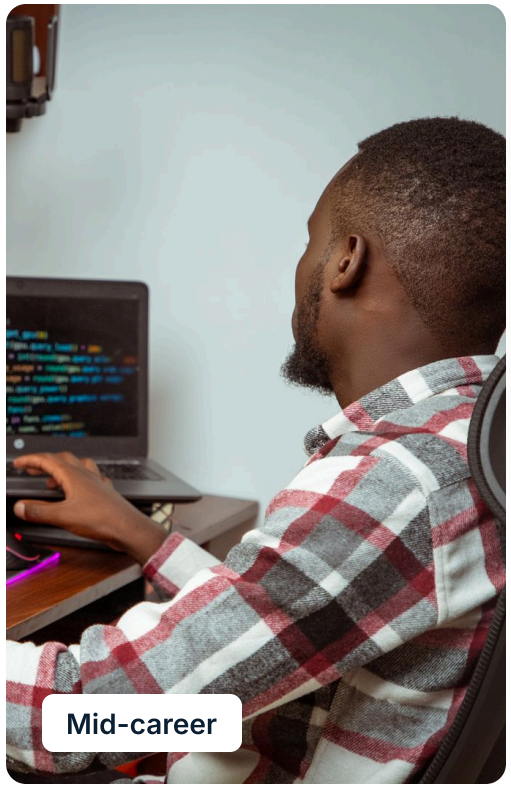

Enrolment: UNESCO Institute for Statistics, indicators 20082 and 25053, world, 2024.

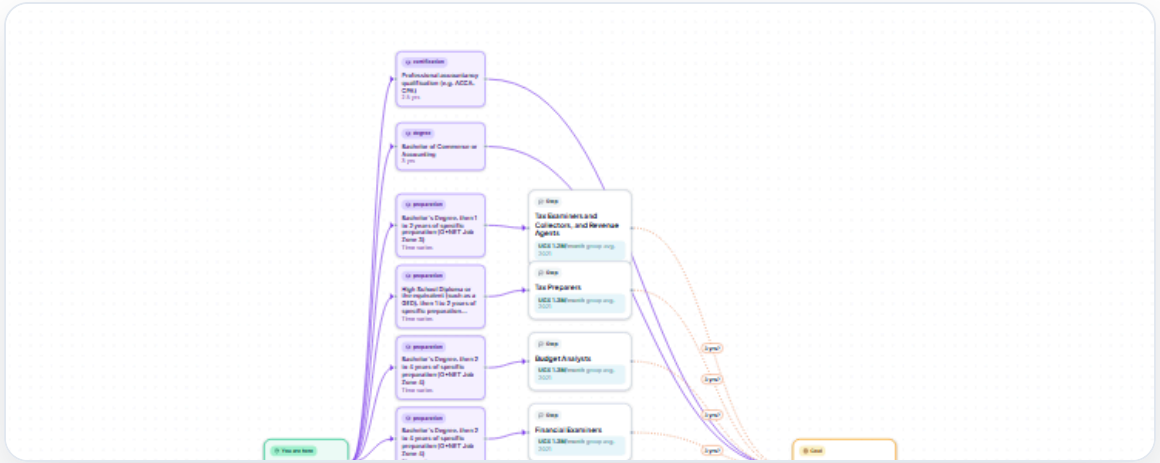

Solution

Every route to the career you want

Start from school or at any point in your career.

Forwards or backwards
from where you are, or from the goal

Every step shown
qualifications, time and pay in between

Honest
less-certain moves are marked as such

Product

938
careers in a route network of 6,682 links

170
countries with official pay or minimum-wage data

30,326
universities and colleges in 223 countries

10
school curricula: Cambridge, IB, AP, A level, national exams

Path planner
Every route between two points, ranked by time

Subject selector
Which subjects keep which careers open

Admission calculators
Official weighting rules and past cut-offs

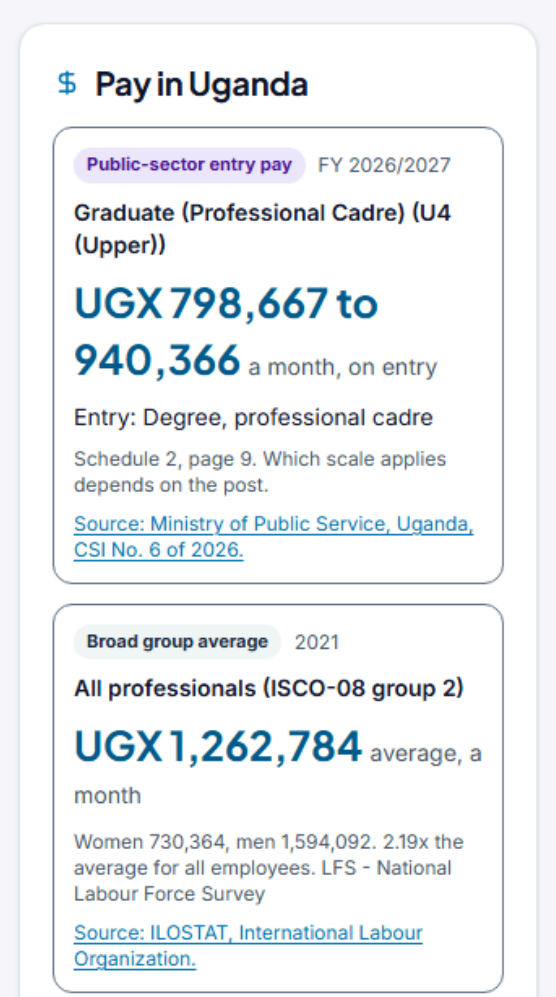

CV builder
Skills suggested for the target career

Salary check
A job offer compared with official pay

Finding work safely
Recruitment-fee rules and scam warnings

Also: 68 in-depth career guides, 2,909 occupations on the ILO ISCO-08 standard, 32 school subjects linked to careers, FAQs with cited answers.

Official data, never guesses

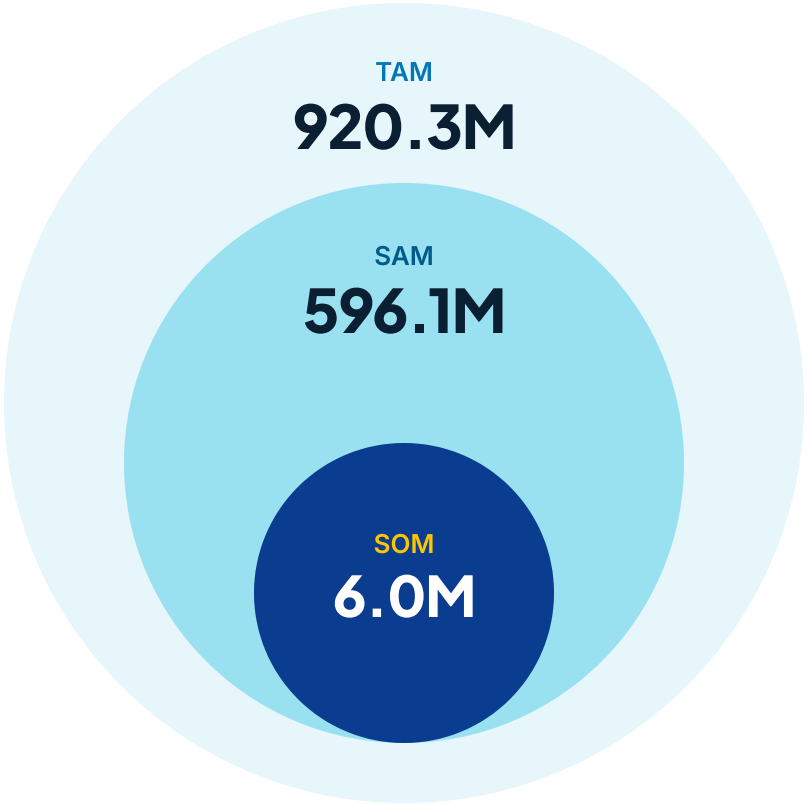

Pay by country, from the publisher. National pay statistics, public-service salary scales, legal minimum wages and ILO data for 170 countries, in the publisher's currency with source and year.

Admission rules from official sources. Weighting systems, UCAS Tariff points and three years of past cut-offs. We show the rules; we never predict a "chance".

72 sources, each with its licence. ILO, UNESCO, EU ESCO, O*NET, national statistics offices, ministries and exam boards.

Market size

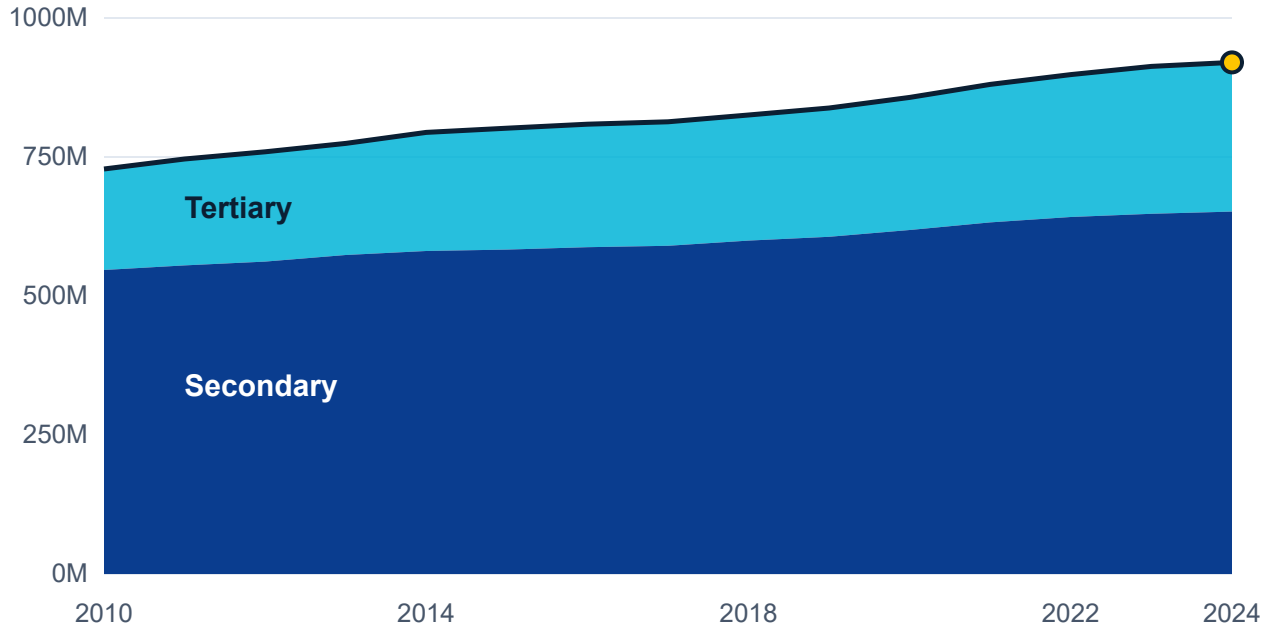

STEP	RATE	STUDENTS	AT US$1, ONCE
TAM: students in secondary and tertiary education worldwide		920.3M	US$920M
who use the Internet (ages 15 to 24)	82%	754.6M	
SAM: online and able to pay US$1 digitally (adults with an account)	79%	596.1M	US$596M
SOM: our five-year target share of SAM	**1%**	**6.0M**	**US$6.0M**

Pricing: a one-time US$1 fee for lifetime access. Rates are applied in sequence and assumed independent; youth Internet use and adult account ownership are proxies for students' access and ability to pay. The 1% share is our assumption (scenarios on slide 10).

Sources: UNESCO Institute for Statistics, enrolment, world, 2024 (indicators 20082, 25053); ITU, Facts and Figures 2025, Internet use ages 15 to 24; World Bank, Global Findex 2025, account ownership, adults worldwide.

The market is growing

Students in secondary and tertiary education, world, 2010 to 2024

+26%

students since 2010: 728.6M to 920.3M. Growth of 1.5% a year over 2014 to 2024; tertiary 2.3% a year.

79% → 82%

of 15 to 24 year-olds online, 2024 to 2025

51% → 79%

of adults with an account they can pay from, 2011 to 2024

> **About 1 billion students by 2030** if the 2014 to 2024 trend continues. This is an extrapolation, not a forecast.

Sources: UNESCO Institute for Statistics (indicators 20082, 25053); ITU Facts and Figures 2024 and 2025; World Bank Global Findex 2011 and 2025.

Business model

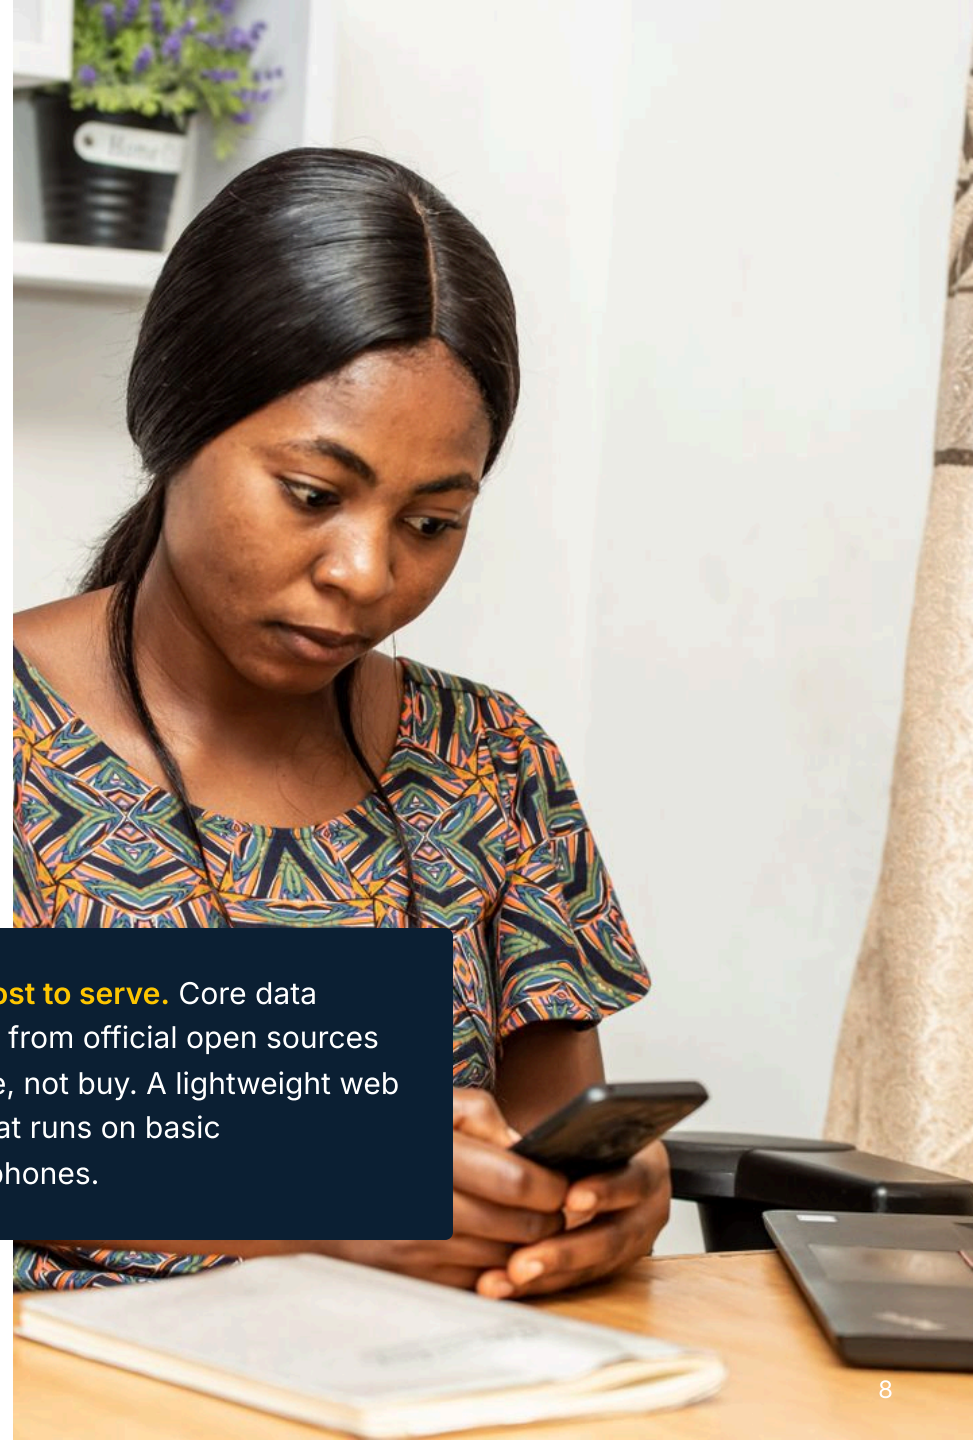

US$1, once. Lifetime access.

Priced so almost any student who is online can pay.

Students: a one-time US$1 fee for lifetime access, from school through every career move.

Schools and counsellors: class dashboards and reports, priced per student.

Universities, employers, governments: verified listings, reaching eligible students, anonymised aggregate insight.

Low cost to serve. Core data comes from official open sources we cite, not buy. A lightweight web app that runs on basic smartphones.

Go-to-market

Search

Thousands of career, pay and admission pages on official data, found when students search.

Sharing

Route maps students send to friends and parents on WhatsApp and social media.

Schools and counsellors

Whole classes at once, timed to subject choice and admission seasons.

Partners

Universities, exam boards, NGOs and ministries that need students to choose well.

> **Every country is covered from day one** on ILO and UNESCO standards. Going deeper means adding a country's exams, admission rules and pay scales as data, not new software.

Five-year outlook

Share of the serviceable market (596.1M students) paying US$1 within five years.

Cautious

0.25%

1.5M students

US$1.5M in student fees

Realistic (our target)

1%

6.0M students

US$6.0M in student fees

Strong

3%

17.9M students

US$17.9M in student fees

Cumulative over five years, from student fees only: before school, university, employer and data revenue. Shares are our assumptions.

Competition

	ROUTES FROM SCHOOL OR ANY JOB	WHERE PAY DATA COMES FROM	SUBJECTS AND ADMISSION RULES	BUILT FOR
CareerProof Global	**Yes: 938 careers, 6,682 links**	**Official publishers, 170 countries**	**Yes, cited by country**	**Students and career changers, any country**
Glassdoor	No	Employee-submitted reports	No	Job seekers; company reviews
Indeed	No	Job adverts and user reports	No	Job seekers
PayScale	No	Salary surveys	No	Salary benchmarking
LinkedIn	No	Member-submitted	No	Professional networking and hiring
O*NET / CareerOneStop	Related careers, US only	US official statistics	No	US job seekers and students

Others answer *"what does this job pay?"* for people already in the job market. We answer **"how do I get there from here?"**, starting at school.

Competitive advantage

Cited official data

72 licence-checked sources, assembled and cross-coded

Route network

938 careers and 6,682 links from guides, O*NET and EU ESCO

Rules as tested data

Admission rules stored as versioned, tested data, not text

Built to scale

International standards; a new country is data, not code

The lead grows with every country we add.
