THE PROBLEM

Young Africans make life-shaping choices with almost no reliable information

- **Careers are invisible.** Students know a handful of professions; thousands of real jobs, and the routes into them, are never explained.
- **Subject choices close doors silently.** The wrong A-level combination at 16 can rule out medicine or engineering, and students find out when they apply.
- **Admission rules are scattered** in PDFs and on social media.
- **Career sites are not built for Africa.** They quote American pay and ignore African exams, regulators and institutions.
- **Job seekers are targeted by fake recruiters** charging fees for jobs that do not exist.

104.7M

secondary-school students in Africa (2024), each choosing subjects and courses

3,629

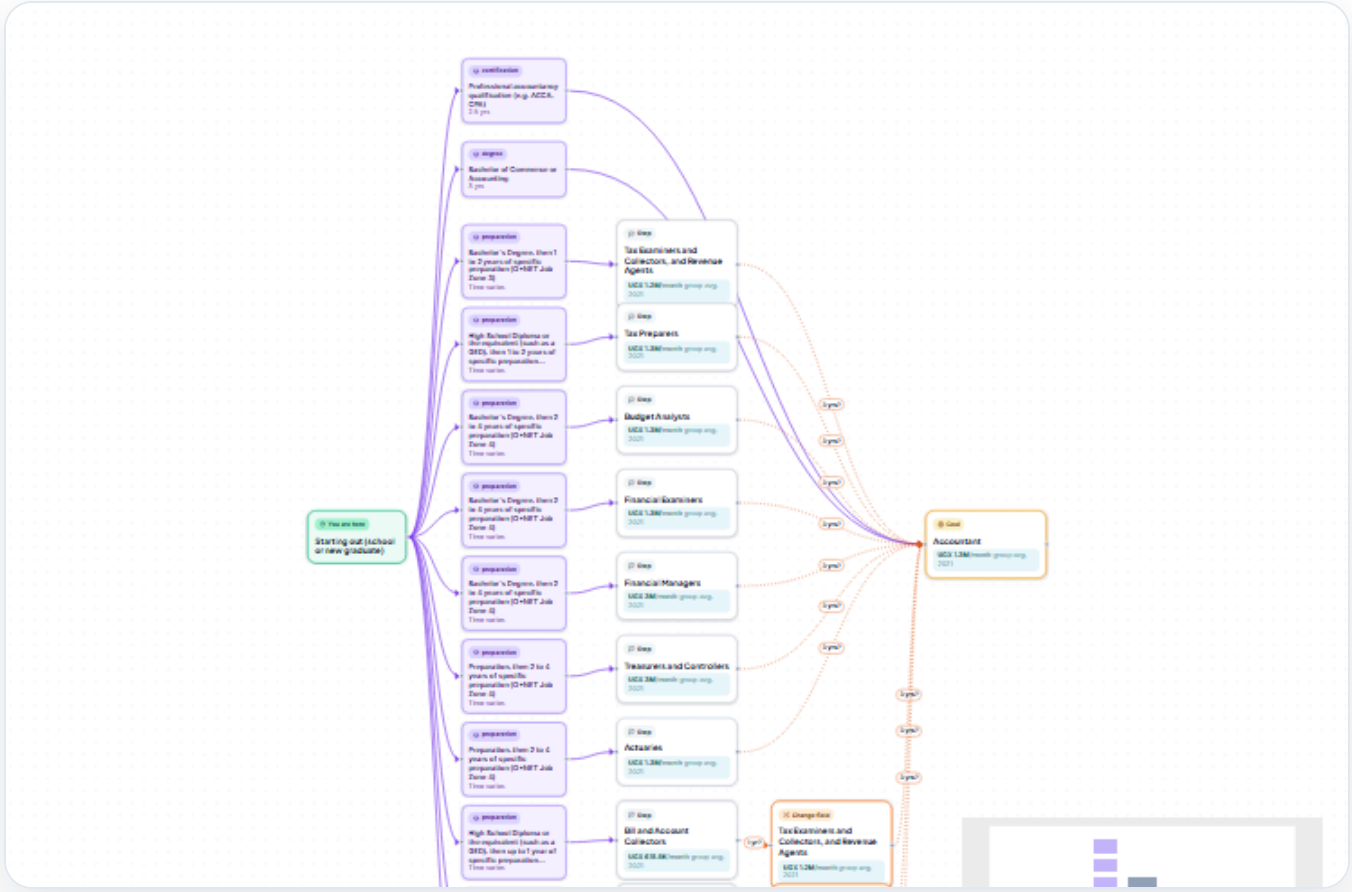

accredited programmes in Uganda alone to choose between

Enrolment: UNESCO Institute for Statistics, secondary enrolment, African Union region, 2024 (UIS indicator 20082, February 2026 release).

THE SOLUTION

Every route from where you are to the career you want

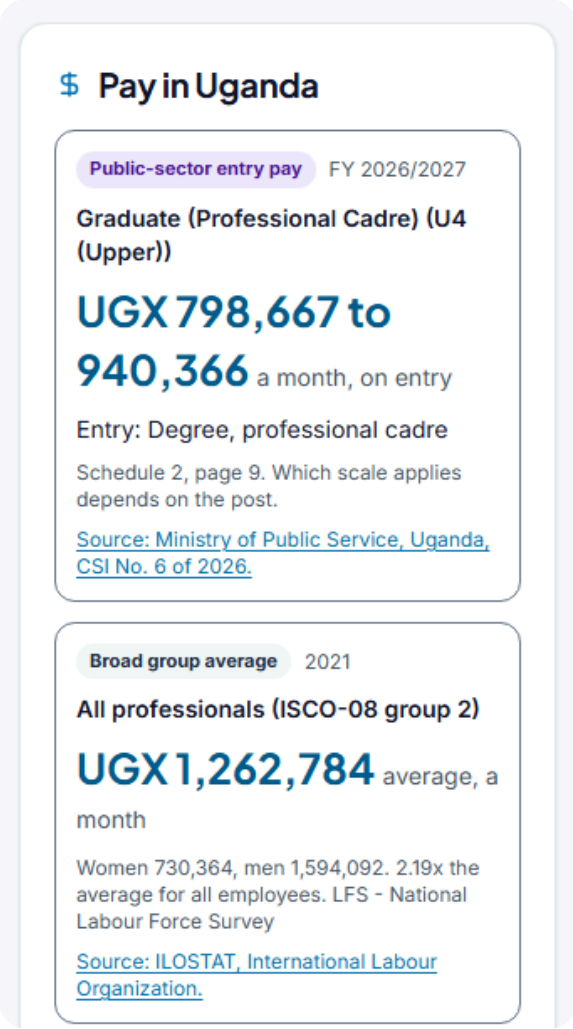

Start from school or any job. See every route, forwards or backwards, with the qualifications in between and pay in your country.

- **938 careers, 6,682 links** from career guides, O*NET related occupations and EU (ESCO) shared skills
- **No limit on steps**; routes ranked by published time
- **Honest:** moves based only on shared skills are marked as less certain
- Example: 12 routes from school to Accountant in Uganda

WHAT MAKES IT TRUSTWORTHY

Official pay and admission rules, never guesses

Pay by country, from the publisher

Public-service salary scales (Uganda, South Africa), national pay statistics (US, UK, Canada, Australia), Kenya's legal minimum wages, World Bank and UN scales, ILO data for 170 countries. In the publisher's currency, with source and year.

Uganda admissions from official sources

The 2026/2027 weighting system in a points calculator, 3 years of cut-offs for 113 programmes, 3,629 active accredited programmes. We show the rules and past cut-offs; we never predict a "chance".

72 sources, each with its licence

ILO, UNESCO, EU ESCO, O*NET, national statistics offices, ministries, exam boards.

LIVE TODAY

Built in November 2026, free, no sign-up

938
careers in the route network

170
countries with official pay or minimum wages

30,326
universities and colleges in 223 countries

10
school curricula: Cambridge, IB, AP, UACE, KCSE, WASSCE, NSC and more

CV builder

A clear CV or résumé, with skills suggested for the target career. Stays on the user's device.

Salary check

Places a posted pay range against official pay for the same job and country.

Finding work safely

Official rules on recruitment fees, licensed recruiters in Uganda, scam warnings.

Also: 68 in-depth career guides, 2,909 occupations on the ILO ISCO-08 standard, 32 school subjects linked to careers, UCAS Tariff calculator, FAQs with cited answers.

MARKET

Every secondary student in Africa has to choose

104.7M

secondary students in Africa, 2024 (78.1M in sub-Saharan Africa)

US$209M

a year at a US$2 per-student school licence, before university, employer and data revenue

NEXT MARKETS	SECONDARY STUDENTS
Nigeria	15.2M (2023)
Kenya	6.7M (2023)
Ghana	3.3M (2024)
Rwanda	0.9M (2024)

Built on ILO and UNESCO standards, so every country already has a basic version. Going deep means adding a country's exams, admission rules and pay scales as data, not new software.

Enrolment: UNESCO Institute for Statistics (UIS indicator 20082), February 2026 release. Licence price is our assumption.

BUSINESS MODEL

Free for students, always. Paid by those who serve them.

CUSTOMER	WHAT THEY PAY FOR
Secondary schools (first)	Counsellor dashboard and class reports; termly subscription priced per student
Universities and colleges	Verified programme listings; anonymised insight into student interest
Employers and scholarship providers	Reaching eligible students; internship and graduate-job postings
Governments, NGOs, researchers	Anonymised, aggregated data on subject choices and career interest

Low cost to serve

Core data comes from official open sources we cite rather than buy; a lightweight web app on basic smartphones.

Cheap to expand

A new country is data (exams, rules, pay, institutions), not new software.

GO-TO-MARKET

Uganda pilot, then East Africa

1. School pilot

3 to 5 Ugandan secondary schools, through careers teachers and S4 to S6 classes, timed to subject choice and admissions.

2. Paid schools

Convert pilots to a termly subscription; grow through head-teacher and careers-teacher networks.

3. East Africa

Kenya (KUCCPS), Rwanda and Tanzania on the same platform.

WHEN	MILESTONE
Nov 2026	Live: path planner, pay by country, Uganda admissions, curricula, CV and salary tools
Dec 2026 to Mar 2027	Uganda school pilot; data partnerships with NCHE, PUJAB and universities
Feb 2027	Kenya admission data; first paying school
Mid 2027	Accounts and counsellor dashboard, after data-protection registration

Growth channels: search (thousands of pages built on official data), WhatsApp-shareable route maps, results-season campaigns.

COMPETITION

Others list careers. We map routes, on official data.

	ROUTES FROM ANY START	OFFICIAL LOCAL PAY	AFRICAN EXAMS AND ADMISSIONS	FREE FOR STUDENTS
CareerProof Global	**Yes**	**Yes, 170 countries**	**Yes, cited**	**Yes**
Official portals (KUCCPS, universities)	No	No	One system each	Yes
Global career and salary sites	No	Often user-reported estimates	No	Mostly
Cut-off lists on social media	No	No	Unverified	Yes
Careers teachers	Limited time	Rarely	Local knowledge	Few and overstretched

Hard to copy: an assembled, licence-checked dataset of 72 sources, crosswalks between national and international codes, and admission rules stored as tested, versioned data. The lead grows with each country.

TEAM AND ASK

Three co-founders in Kampala

Kambugu Abdallah
Co-founder

Kintu Moses
Co-founder

Gutabingi Jamilah
Co-founder

The ask: prize funding to run the Uganda school pilot and add Kenya.

Free for students, always. Official data only. Built for Africa.

Data partnerships (Uganda, Kenya)	30%
School pilot	25%
Product: accounts, counsellor tools, languages	25%
Legal and data protection	10%
Hosting and tools	10%
